Fraser's Tested Dahlias

1-9-2-7

Fraser's Dahlia Gardens
Geo. W. Fraser, Prop.
Willimantic, Connecticut
Again we greet our friends, old and new, and take this opportunity to express to you our appreciation for the generous patronage we have received in the past, and to assure you that we will do all in our power to merit a continuance of your support in the coming season.

Our policy of testing every variety in our trial garden, before listing in our catalog, still holds good, and every year we discard many varieties, no matter how much they cost us, if they do not measure up to our standard.

Our business is increasing and we are building another greenhouse in order to keep up with the demand for our green plants, we have also extended our field plantings, so are in position to fill your orders with clean, healthy, field grown stock. We spray, and dust all our growing stock regularly during the season thus insuring stock free from the so-called "stunt" and disease. The one great thing in growing good dahlias is to spray, or dust, with some nicotine preparation, every week or ten days, during June and July, one will then hear less about the so-called "stunt" as it has been proven that most of the trouble is caused by insects attacking the young plants during the hot season. Try it and see for yourself.

Take a few days off next fall and attend the Field Day of the American Dahlia Society at the Trial Gardens, Connecticut Agricultural College, Storrs, Conn. You will be well repaid for the time spent, meeting other dahlia fans, and listening to the latest reports by experts on Diseases and Insects, and the growing of our favorite flower, besides other things of interest around the campus. The college is 8 miles from Willimantic, and is reached by regular bus line, from the R. R. depot.

We also extend to you an invitation to visit our gardens anytime during the season, and to talk dahlias, as well as look and admire them. We are located on the Willimantic-Norwich trunk line, adjoining the Willimantic Camp ground. Five minutes from center of city.

Thanking you again for past favors, assuring you that all orders will receive our best attention.

GEO. W. FRASER.

COLLECTIONS

To those not acquainted with the various classes and varieties of dahlias we would suggest that you leave the selection to us. Tell us what colors you most prefer, and the amount of money you wish to invest and we send you a collection that cannot fail to give you satisfaction.

R. 1, WILLIMANTIC, CONNECTICUT
OUR INTRODUCTION FOR 1927

SUSAN PECK McANEENY

Tubers $10.00. Plants $5.00.

Owing to the great demand for our new yellow decorative

"YELLOW PRINCESS"
The Best Yellow Decorative to Date

We have decided to postpone the introduction of this variety until 1928 so that we can put it on the market at a reasonable price. Watch it in our gardens, and at the shows next fall, and place your orders early as the advance orders from those that have seen it, are already piling up. A S. D. Certificates of Merit, Storrs, Conn. 1926.

Tubers $10.00. Plants $5.00.

GENERAL INFORMATION

PLEASE READ BEFORE ORDERING

ORDER EARLY—All orders filled in rotation—ordering early insures reservation of varieties that may later be sold out.

Small orders receive the same careful attention as the large ones.

SUBSTITUTION—Orders are filled with varieties called for, and, we never substitute unless directed to do so.

GUARANTEE—We guarantee every root, and plant, to be true to name and in good growing condition when sent out by us. We will cheerfully replace any that may prove otherwise, but will not be held responsible for any amount in excess of the purchase price.

If, for any reasons, roots (tubers) fail to sprout, return same to us with tag attached, and we will replace same with a perfect root. However, we will not be responsible if they are kept in a too dry place a long time before planting or otherwise abused.
SHIPPING—We begin shipping dahlia roots (tubers) after May 1st, unless notified for earlier delivery. Green plants after May 25th. Dahlias ordered shipped before April 15th will be sent only at Purchaser’s risk of drying out or freezing.

TERMS—Cash with order or in advance of shipment. No goods sent C. O. D. unless 50 per cent. of purchase price accompanies order.

REMITTANCES—Should be made by bank draft, post office money order or registered letter. Postage stamps accepted up to $2.00.

SIZE OF ROOTS—(Tubers) the size of the root does not in any way indicate the size of the plant, or flower. Some varieties of dahlias always produce small roots, while other varieties make large ones. A good many of the best varieties have very small roots, so do not consider small roots worthless. Any root with a good growing bud will grow, and make a good plant if properly looked after.

CULTURAL DIRECTIONS—Inclosed with each order.

ERRORS—In the rush of the shipping season errors are possible to occur. Kindly notify us promptly so that proper adjustment can be made at once. Kindly keep a copy of your order for comparison.

DAHLIA GREEN PLANTS

Our green plants are propagated right, grown right, and guaranteed to reach you in good condition. We ship every year, thousands of plants to all parts of the country, and the repeat orders from satisfied customers, and our increasing new business has made it necessary to increase our propagating space.

Margaret Masson (Fisher & Masson) Dec.—A wonderful exhibition flower, the color is silvery rose pink, flowers large and deep, good stem and free flowering .......... 4.00

Margaret Woodrow Wilson (Fisher & Masson) Dec.—A beautiful flower of rather unique coloring hard to describe, the nearest I believe is opalescent pink. Large flowers of splendid form held well above the foliage on good stems ............................................. 7.50

Marmion (Mastick) Dec.—Golden yellow, reverse of petals suffused with bronze, shading to deeper bronze towards center; large flowers held well up above the foliage. I consider this the best variety Mr. Mastick has introduced. I had the opportunity to see it exhibited at several shows where I was judging last fall, and it was always an outstanding attraction ........................................... 10.00

Mariposa. (Bessie Boston) H. C.—Pink suffused with lilac, an extra large flower, good grower and fine stem. An excellent exhibition variety .................................................... 2.50

Meadow Lark (Burns) Dec.—Large flowers of a beautiful combination of shadings of buff and straw. The flowers are carried well above the foliage on long stiff stems... 3.00

Mordella (King-Kemp) Dec.—You will like this fine variety. The color is a bright clear shade of apricot buff. The large flowers are carried on long stems well above the foliage ............................................................. 3.00

Minamoto. (Minamoto-Boston) H. C.—Very large flowers of bright scarlet. Stem long and stiff, holds flowers well up ............................................................ .50

McGregor. (Mastick) H. C.—Large full flowers on strong stems, color spectrum red, free flowering. A. D. S. Certificate of Merit, 1922 ..................................................... 2.00

Mephistopheles. (Marean) Dec.—Immense flowers of vivid scarlet, points of petals tipped with yellow, produced on top of long stiff stems. A grand exhibition variety ................................................................. 1.00

Mrs. W. E. Estes. (Estes) H. C.—Pure white, flowers of great size and depth, stems hold flowers well up above foliage ................................................................. 1.00

Mrs. Carl Salbach. (Salbach) Dec.—The color is a beautiful shade of pink. The flowers are perfectly formed, and are held up high above the foliage on long stiff stems. Awarded Gold Medal by the California Dahlia Society, also Certificate of Merit by the A. D. S. Storrs, Conn., 1919 ................................................................. .75
Mrs. Ethel F. T. Smith. (Broomall) H. C.—One of the largest dahlias grown. The color is creamy white, shading to lemon yellow towards the center; good stem  

Mrs. Eleanor Martin (Pelicano) Dec.—One of the best 1924 introductions. The color is a beautiful mulberry suffused with gold, the form is perfect, and the large flowers are carried on long stiff stems. Should be in every collection  

Mrs. John Scheepers. (Marean) Dec.—An immense flower, color a clear canary yellow, with pink suffusing. A beauty  

Mrs. I. De Ver Warner. (Marean) Dec.—To fully appreciate this beautiful flower one must see it growing. The color is a pleasing shade of mauve pink, perfect form, and immense size. The stem is long and holds the flower well up  

Papillon (Bessie Boston) H. C.—Large flowers of a beautiful shade of old rose, with golden suffusion; early, and very free flowering; good strong stems  

Patrick O'Mara (Vincent) Dec.—Orange buff shaded rose pink. The best keeping dahlia when cut that I know. Strong stems. A. D. S. Certificate of Merit, Storrs, Conn., 1920  

Paul Michael. (Michael) Dec.—In the largest flower class this variety is hard to beat. Color, pure gold, shading to orange-buff at center  

Patapsco. (Vincent) H. C.—Very free flowering, color, soft orchid pink, stems hold flowers well up above foliage  

Pierott. (Stredwick) C.—A very unique variety. The flowers are large and are composed of long, narrow tubular petals of deep amber, tipped white. Very free flowering and very attractive both in the garden and on the exhibition table  

President Wilson. (Jones) Dec.—No flower attracted so much attention in our gardens as this variety. The color is vermillion red tipped white, a most striking combination of colors; flowers of perfect form, large size on stiff stems  

Pride of California. (Lohrmann) Dec.—A robust grower and very free flowering. The large deep red flowers are borne high above the foliage on long stiff stems. A good keeper when cut  

---

R. 1, WILLIMANTIC, CONNECTICUT
Purity. Dec.—Free flowering, pure white variety; with long stiff stems, fine for cutting ........................................... .50

Polar Snow (Marean) Dec.—One of the best white decorative; flowers large, perfect form and great depth, long stem ................................................................. 4.00 2.00

Primula Rex. (Broomall)—Another wonderful flower from Eagle Rock, a sensation wherever exhibited. Color, Primrose Yellow, very distinctive, and one of the largest flowers grown. Has everything to recommend it. Plants only .......................................................... 4.00

Queen Mab. (Bessie Boston) Dec.—A graceful narrow petalled variety, the color is pale pink shading to white in the center; free flowering; wiry stem ................................. 1.00

Radio (Sampson) Dec.—Here s a variety that never fails to attract attention. The color is a combination of Blood Red tipped and edged with yellow. Immense flowers held erect on rigid stems .......................................................... 3.50 1.75

Rose Fallon (Marean-Harding) Dec.—This variety was the sensation of the New York show 1925. A magnificent flower of a pleasing shade of amber russet and salmon. Large flowers of perfect form on good stems. True stock 10.00 5.00

Robert Scott (Brock) Dec.—Apricot yellow, with rose suffusions shading darker towards the center. Large flowers on good stems .......................................................... 5.00 2.50

Robert Treat (Mueller) Dec.—Color American Beauty Rose; this variety has won several cups and medals during the past two seasons. The large flowers are held perfectly erect on strong stems .......................................................... 2.50 1.25

Regent. (Bessie Boston) C.—Beautiful flower of clear mauve pink; the large flowers are held well up on good stems, very free flowering; splendid for exhibition and cutting .......................................................... 1.50 .75

Rienzi. (Bessie Boston) Dec.—“Big, bold flowers of great depth and of unique coloring, bright scarlet verging on vermillion, with reverse of gold.” Stems stiff, holds flowers well up. One of the best in our garden last season .......................................................... 3.00 1.50

Rotarian. (Vincent) H. C.—Tyrian Rose and amaranth purple, shading to pansy purple in center; free flowering, good stem. A. D. S. Certificate of Merit, Storrs, Conn., 1923 .......................................................... 2.50 1.25

Sanhican’s Blue Bird (Fisher & Masson) Dec.—A dwarf growing variety: early and free flowering. The color is a beautiful violet blue. Good stem .................................................. 3.00 1.50
Sanhican's Magnate (Fisher & Masson) Dec.—“Exhibition decorative of a pale aramanth pink; face of petals tinged with a deeper shade; reverse of petals a solid claret color, heavily veined.” Dwarf; stiff stems. One of the best. D. S. N. J. Certificate of Merit ................................. 6.00 3.00

Sanhican's Ruby (Fisher & Masson) Dec.—Color a deep shade of “Pigeon’s Blood” suffused with bronze. Flowers large and deep; good stem. D. S. N. J. Certificate of Merit ......................................................... 1.50

Shelikoff. (Mastick) Dec.—Color a beautiful deep garnet. The flowers are of perfect form, large and deep. Long stiff stems. A. D. S. Certificate of Merit, Storrs, Conn. .75

Siskiyou (Broomall) H. C.—Pink tinged mauve. This immense flower with its unique petal formation always attracts attention; it has created a sensation wherever exhibited. Flowers held erect on stiff stems .................... 2.50 1.25

Southport Pride (Wakeman) Dec.—Large flowers of pale yellow with light lavender suffusion, held erect on stiff stems. Dwarf and free flowering. A. D. S. Certificate of Merit ................................................................. 2.50 1.25

St. Francis. (Bessie Boston) Dec.—Large, well formed flowers of a soft cream color with shading of pink. Good stem and keeping quality ......................................................... 2.00 1.00

Shadow’s Lavender. (Bessie Boston) Dec.—Large flowers of a delightful old rose suffused with lilac, and shadings of greenish white towards center. The stems are long and erect holding the large flowers well above the foliage .......................................................... 3.50 1.75

Snowdrift. (Broomall) Dec.—Large white decorative. The large flowers are perfect in form, with broad waxy, pure white petals. A splendid keeper. Fine for exhibition .......................................................... .75

Susan G. Tevis (Bessie Boston) Dec.—Deep lilac with bluish tone. A vigorous grower with dark, bronze foliage, large flowers, strong stem ................................................................. 2.00 1.00

Tehachepi (Broomall) H. C.—This might well be called Yellow Gladys Sherwood, form and habits being somewhat similar. A fine yellow and worthy of a place in every garden ................................................................. 2.50 1.25

T. A. Leonard. (Bessie Boston) Dec.—An attractive and free flowering variety, color deep carmine rose. The large flowers with their peculiar petal formation always draws attention in the garden. Stem good ........................... 2.50 1.25

BARGAIN COUNTER
I HAVE A QUANTITY OF DAHLIA ROOTS THAT HAVE BECOME MIXED IN HANDLING. ALL GOOD VARIETIES.
WHILE THEY LAST, $3.50 PER DOZ.

You Are Invited to Become a Member of
THE AMERICAN DAHLIA SOCIETY
The Bulletin of the society is published quarterly and contains valuable information on Dahlia growing. It is sent free to every member. Dues $2.00.
Write WM. J. RATHGEBER, SECRETARY, 198 NORTON STREET, NEW HAVEN, CONN.

GLADIOLI
HOW TO GROW GLADIOLI
The gladiolus like the dahlia will thrive in almost any climate and any kind of soil.
The bulbs should be planted from four to six inches deep after the ground has warmed up in the spring and the danger of frost over.
Cut the flowers as soon as the lowest bud opens, taking care to leave four or five of the lower leaves to help the growth of the new bulbs.
Lift the bulbs in the fall and store in a dry place, free from frost.

FRASER’S TESTED GLADIOLI
THE CREAM OF MODERATE PRICED VARIETIES

Anna Eberius.—A very much admired large deep purple, shading to deeper throat. This variety is a fine grower and multiplies rapidly.

Alice Tiplady.—Most attractive large Primulinus species of a rich salmon orange, with soft genanium tongue. The growth is rather low and the flower stalks are very graceful. Splendid for table decorations.

Byron L. Smith.—A beautiful orchid-like lavender pink. The blooms are large, wide open and exceptionally well packed. One of the choicest.

Carmen Sylva.—Pure snow white, throat slightly penciled lilac. Very large open flowers of the finest form. 15c each $1.50 doz.

Crimson Glow (Betscher).—A very large wide open glowing crimson. The flowers are of fine form and exceedingly well placed on the spike. A vigorous grower and by far the best crimson. 5c each 50c doz.

Diener’s American Beauty.—Brilliant American beauty color, prominent cream yellow throat. The flowers are very large and well placed on the spike. A great many open at one time making each spike a bouquet in itself.

Evelyn Kirtland.—A large, wide open flower, rosy pink shading to shell pink in throat. Spikes are long and graceful. One of the best for cutting.

R. 1, WILLIMANTIC, CONNECTICUT
Flora.—A beautiful canary yellow with scarcely any markings. The blooms are large and well placed on the spike ..........10c each $1.00 doz.

Freda. (Salbach) 1923—Very large, wide open geranium pink shading to La France pink center. Cream lip with faint carmine markings in throat. A vigorous grower. ........................................ 35c each $3.50 doz.

Le Marechal Foch (P. Van Deursen).—Pure delicate rosy pink, wide open, broad petaled. Very large lily-like flower. Blooms two weeks earlier than America, and multiplies rapidly .................10c each $1.00 doz.

Louise. (Wright).—Large, well opened orchid-like flower. The color is an attractive bright blue lavender, with wine-colored blotch in throat. One of the finest lavenders ........................................15c each $1.50 doz.

Mary Pickford.—A beautiful refined white with delicate cream throat. Awarded Certificate of Merit by Royal Horticultural Society, London, in 1920 ........................................ 15c each $1.50 doz.

Mrs. Frank Pendleton.—The flowers are of large size, borne on strong graceful spikes. The color is a beautiful soft pink with brilliant deep red blotches in throat ..................................................10c each $1.00 doz.

Mrs. Dr. Norton.—Delicate cream and pink, very graceful spike. Much admired in the garden and an exceptionally fine gladiolus for table decorations ..................................................20c each $2.00 doz.

Mrs. Watts.—A rare shade of deep brilliant wine color. Strong straight grower. .................................................. 10c each $1.00 doz.

Prince of Wales. (Kelway)—An early flowering variety with large spikes of a delicate apricot-pink suffused salmon. ............ 15c each $1.50 doz.

Rose Ash. (Metzner).—General effect, what is commonly known as ‘Ashes of Roses.’ It is fine in its pastel coloring, fine in the garden and as a cut flower. ..................................................15c each $1.50 doz.

Schwaben.—Delicate primrose with yellow and crimson center, large flower. .................................................. 10c each $1.00 doz.

Salbach’s Prim. (Salbach) 1923—Tall, peach red shading to strawberry pink, deep in throat; empire yellow on two lower tips. ..................................................15c each $1.50 doz.

Wilbrink.—Lovely flesh-pink with creamy blotch on lower petals; one of the earliest to bloom. .................................................. 10c each $1.00 doz.

Special Offer.—Assortment of good unnamed varieties .50c doz. postage extra.

AGERATUM FRASERI

The ideal Ageratum for pot plants and bedding, dwarf robust compact grower, large flowers, true Ageratum blue.

From 2 1-2-inch pots, $1 per doz., $7.50 per 100. From 3-inch pots, $1.50 per doz., $10 per 100.

We carry a full line of Nursery stock, also hardy perennials, hardy lilies, etc. Write for list.

R. 1, WILLIMANTIC, CONNECTICUT
CLASSIFICATION OF DAHLIAS

AS ADOPTED BY THE AMERICAN DAHLIA SOCIETY

Cactus Dahlias.  a.  True, fluted type.  Flowers fully double; floral rays (petals) long, narrow, incurved or twisted, with sharp, divided, or fluted points and with revolute (rolled back) margins, forming, in the outer florets, a more or less perfect tube for more than half the length of the ray.

b.  Hybrid cactus or semi-cactus type:  Flowers fully double; floral rays short as compared with previous type, broad, flat, recurved or twisted, not sharply pointed except when tips are divided (staghorn), margins only slightly revolute, and tubes of outer florets, if any, less than half the length of the ray.

Decorative Dahlias.  Double flowers, full to center in early season, flat rather than ball-shaped, with broad, flat, somewhat loosely arranged floral rays with broad points or rounded tips which are straight or decurved (turned down or back), not incurved, and with margins revolute if rolled at all.

Ball-Shaped, Double Dahlias.  a.  Show type:  Double flowers, globular or ball-shaped rather than broad or flat, full to center, showing regular spiral arrangement of florets; floral rays more or less quilled or with markedly involute margins and rounded tips.

(The class called Fancy Dahlias is not recognized separately in this classification, but is included in the sub-section A.)

b.  Hybrid show, giant show or colossal type:  Flowers fully double, broadly hemi-spherical to flatly globular in form, loosely built so spiral arrangement of florets is not immediately evident; floral rays broad, heavy, cupped or quilled, with rounded tips and involute margins.

c.  Pompon type:  Shape and color may be same as A or B; but must be under two inches in diameter.

Paeony-flowered, or "Art" Dahlias.  Semi-double flowers with open center, the inner floral rays being usually curled or twisted, the other or outer petals being either flat or more or less irregular.

Duplex Dahlias.  Semi-double flowers, with center almost exposed on opening of bud, with petals in more than one row, more than 12, long and flat, or broad and rounded, not noticeably twisted or curled.  Many so-called Paeony-flowered Dahlias belong here.

Single Dahlias.  Open centered Dahlias, small to very large, with 8 to 12 floral rays, more or less in one circle, margins often decurved (turned down or back).  There are no distinctions as to colors.  The type embraces the large Twentieth Century, as well as small English varieties.

Collarette Dahlias.  Single type:  Open centered blossoms with not more than nine floral rays with one or more smaller rays, usually of a different color, from heart of each ray floret, making a collar about the disc.

Anemone-Flowered Dahlias.  Flowers with one row of large floral rays like single Dahlias, but with each disc flower producing small, tubular petals.
